Oval Air Cleaners

Billet Material - 5-1/8" Opening

Machined from 6061-T6 billet aluminum and polished to a perfect mirror shine. Air filter elements are standard sizes and replacements can be found at most any auto parts store. Compare to any of the inexpensive cast air cleaners on the market and there is no comparison!! Polished stainless flush mounting allen screw.

Ball Milled	BLT 15320	\$119.95	BLT 15420	\$129.95

Ribbed Oval Air Cleaners

Billet Material - 5-1/8" Opening

Manufactured from billet material with the ribs or "fins" machined out of the top piece itself from one piece of aluminum. Exquisite detail and perfect polish finish make these air cleaners a true work of art. Common replacement air filter elements

available at most auto parts stores. Dual four barrel carburetor air cleaner also available.

Small - 8-3/8" Wide X 11-7/8" Long	BLT 15630	\$151.95
Large - 8-1/2" Wide X 15" Long	BLT 15640	\$162.95

Quik-Latch Air Cleaner Kit

A simple push button in the center of the latch you push with your finger is all you need to release this fastener. Latching is just as easy as you simply push the air cleaner top over the ball end stud supplied and the latch captures the ball-stud with a snap and it's secure. No tools required to release means no scratching, no loose parts so no lost fasteners. Measures 1-1/4" O.D. and requires 3/4" hole. Each kit comes with under side nut, 1/4"-20 x 4" stainless ball stud with jam nut.

Aluminum Engine Pulleys

No chance of finding any flaws in these CNC machined 6061-T6 billet pulleys from *Billet Specialties*. State of the art machining from the best material means the ultimate in strength, trueness and balance. Water pump pulleys feature 3/16" thick mounting flange which allows some of the water pump pilot shaft to extend out the end of the pulley for mechanical fan centering. Crank pulleys come with stainless mounting hardware and stainless washers. Unbelievable polished finish.

Throttle Cable Kits

Don't Forget Cable Mounting Brackets Specific to Intake System

Lokar throttle cable kits offered in natural braided stainless steel, black braided stainless or black vinyl housing. Cables feature aluminum fittings and aluminum ferrules to eliminate fraying. You cut-to-fit outer housing either 24" or 36" lengths with stainless inner wire. Clevis adapts to factory and aftermarket throttle pedals. Custom lengths available upon request. Cables will mount nicely with Lokar's cable mounting brackets specific to the intake system used. Kits come with installation instructions.

All Cables Available With Black Braided Stainless with Anodized Black Ends. Add "X-" to the Part Number and \$5.00 to the Price for Black Finish.

¹ Cable connects to a bell-crank assembly mounted at the base of the blower used by *BDS, Enderle* and *Weiland*.

Cruise Control Systems

Electric Servo Operated NOT Vacuum!

Advanced electric servo control uses solid-state electronics for exceptional accuracy and reliability. System requires no vacuum so it works great with radical camshafts and blown engines. Simple wiring harness and built in self-diagnostic check makes for an exceptionally easy installation. Each cruise control system is supplied with your choice of control handle. Others handle styles are available.

¹ TH-400 Kickdown is actually a cable that routes to an aluminum box housing an electric switch that activates on full throttle to send a power lead to the transmission to achieve the kickdown action. Call for more info.

"Stock Style" Kickdown Cable Kit

Fits GM TH-350 Behind Chevy Small Block Only (Not Vortec Head)

This cable kit is just like the factory original except it comes with a stainless bracket that mounts to the rear two intake manifold bolts on the driver side. This kit will work with the Lokar universal throttle cable using the SRK-4000 bracket, but is not required.

Complete - Cable & Stainless Bracket LKR KD-2350U \$48.95

Stock Style Kickdown Bracket Only (Stainless). LKR KDB-4350 \$24.95

Throttle Valve Cable Bracket for Throttle Linkage

Most overdrive transmissions the 'kickdown' cable is not for a downshifting but it controls the upshifting by pulling this cable yielding 'throttle valve pressure' to the valve body as the throttle

is opened. These brackets mount to the carburetor linkage arm and provide a better ratio of increasing throttle valve pressure cable movement proportional to the amount of throttle opening.

Cable Column Shift Linkage Kit

Fits all GM Transmissions except Powerglide

Cable shifter linkage is the ultimate answer to interference issues. Cable system allows you to route the cable around transmission, exhaust and brake pedals. Billet aluminum mounting arm can be positioned on either side of the column. Can be used with Lokar shift indicator kits or with back-up light/neutral safety switch kit (BL-1400U). Heavy duty 6' cable is manufactured with a specially extruded inner liner and stainless inner wire for long life. Longer cables are available.

2" Diameter Columns Including GM Factory Columns	LKR ACA-1804	\$143.95
2-1/4" Diameter Aftermarket Columns (<i>Ididit</i>)	LKR ACA-1805	\$143.95

Column Shift Linkage Kits

The easiest way to connect your shift column to the transmission. Slotted arm allows easy ratio adjustment from column to transmission. Lokar design allows for stainless connection rod to be shortened and reinstalled held into end with set screws. GM kit includes both SAE and metric transmission shift selector nuts. New Ford AOD kit features new transmission selector shaft to eliminate the problems associated with trying hunt for a specific Ford part. Shift arms are available separately.

Lokar Automatic Transmission Shifters

Shifters Available For These Transmissions: General Motors - TH-350, TH-400, 700-R4, TH-200, 200-R4, Powerglide (Aluminum Case), 4L80E, 4L60 & 4L60E Ford - C-4, C-6, FMX & AOD Chrysler¹ - 727, 904 & 518

All Lokar shifters have these great features: Positive lockout in park and neutral, neutral safety switch, 360° lever rotation, Teflon lined button in shifter knob for smooth quiet operation, chrome or black powder coated tapered shifter stick, gold irradiated brackets, hardware and instructions.

"Bench Bend" Stick

Bench Bend stick to bring the stick forward and around the front of a bench seat. Only offered in 16" length this is available as a replacement stick to fit all Lokar shifters and can also be ordered installed on a new shifter purchase. Please call for more information.

Nostalgia (Shown In "Midnight" Series)

All shifter models are available with black powder coated stick.

Standard

Tail Mount

Standard shifter: Shifter mounts to a main plate that attaches to the transmission case. The shifter may be positioned anywhere up and down this main plate allowing you to place it right where you want as long as its in-line with the driveline

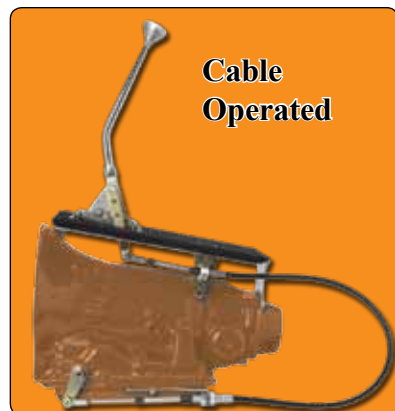

Nostalgia Shifter: Identical to the standard shifter except the shifter stick has two bends, is only available in 16", 23" & 32" lengths and comes standard with a black anodized knob.

Floor Mount

Tail Mount Shifter: Mounts off transmission tail housing bolts only. Bracket allows two mounting locations either slightly forward or rearward of tail shaft bolts. Available in 6", 8", 10" & 12".

Cable Operated

Cable Operated Shifter: Versatile shifter location by installing directly to the floorboard and connects with durable 1/4" push/pull cable.

Floor Mount Shifter: Mounts to the floorboard with unique brackets that allow the shifter to install on top of, or slightly recessed into the floorboard. A couple different offset shifter arms included for linkage alignment when offset mounting shifter in relation to transmission.

Piston Shift Knob Ford AOD Polished LKR SK-6859 \$65.95

8-Ball Knob: Features the center white circle with 8 as the push button.

8-Ball Knob..... LKR SK-6850 \$63.95

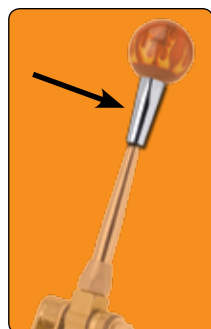

Lokar Shift Knob Adapters

Fits Lokar Shifters Only

Shift knob adapter allows the use of any shift knob with 3/8"-16 or 3/8"-24 thread to be used on Lokar shifters. With adapter installed the knob as a whole is pushed down to work the detent mechanism inside the shifter. Fits all Lokar shifters.

Adapts 3/8"-16 Shift Knobs..... LKR SK-6878 \$29.95

Adapts 3/8"-24 Shift Knobs..... LKR SK-6879 \$29.95

Behind The Dash "Invisible" Shifter

GM TH-350, 400, 700R-4, 200R-4 / Ford C4, C6, AOD / Chry 727 & 904

Unique shifter mounts behind the dashboard allowing you to maintain a smooth steering column and a clean uncluttered floor. Built-in GM neutral safety switch with backup light switch included. Supplied with 84" cable to allow shifter to be mounted on either side of steering column. Cable is routed from the shifter inside the firewall and exits through the floorboard for a clean installation on the engine compartment side too. Shifter accepts 33'-36' Ford cowl vent handle (not included). Will work with most manufactures electronic gearshift indicators.....

State Transmission When Ordering \$159.95

33'-36' Ford Cowl Vent Handle (Chrome) VIN 40-700611 \$ 19.95

LS1 / LS6 Engine Swap Headers

Engine swap headers for the popular LS1 engine that are designed to fit with most popular aftermarket engine swap kits. All are shorty design for maximum ground clearance and require motor mount adapter plates that put engine in stock location.

	Ceramic Coated	Plain (Raw)
Bel Air '55-'57	THU 8046HC ¹ \$449.95	THU 8046 ¹\$299.95

Nova '75-'79	THU 8077HC \$449.95	THU 8077.....\$299.95

¹ Req LS1 oil pan, clears 605 steering, will not fit factory Z-bar clutch linkage.

Block Hugger Headers

LS1 / LS6

Headers for "street rod" use designed to pull the tubes as close to the engine block as possible. All headers feature the tubes welded to the head flange on the gasket side and then faced on a belt sander for a wide, flat gasket sealing surface. All also have a 2-1/2" diameter collector and come with standard paper type gaskets and common header bolts and collector bolts & nuts. Will not fit sub-framed cars or any "clip" where crossmember runs under oil pan.

Ceramic Coating - Aluminum based coating which dissipates heat and resists chipping and discoloring.

Small Block Chevy - 1-5/8" tubes

"Ram Horn" Exhaust Manifolds

NEW cast iron Ram Horn style manifolds for early small block Chevy heads. Good looking castings without any of the smog injection ports or alternator bracket provisions. Manifolds accept 2-1/2" reducers, not included. Pair sets only.

Ram Horn Exhaust Manifolds	SRS 9303	\$169.95
2-1/2" Collectors & Gaskets	SPE 910-13751	\$18.95

KBS Xtreme Temperature Coating

Six Different Colors Available - Check Our Web Site for More Information

A high temperature heat resistant coating formulated specifically to protect metal surfaces operating at temperatures to 1500°F. Long lasting coating will not peel, flake or chalk and is resistant to scratching and marring. Can be

brushed or sprayed and dries to the touch is 15 minutes. After first fire-up the coating will finish heat curing. 8oz can will coat manifolds & shorty headers with 2 coats. Pint can will coat full-length headers with 2 coats.

Camaro / Nova "Clip" Headers

SB Chevy - Clears Straight or Angle Plug Heads

Chevy small block header solves the exhaust problems created when grafting on '67-'81 Camaro, '68-'79 Nova, '64-'87 Chevelle, Malibu, El Camino or '70-'87 Monte Carlo front clip suspensions. Features longer primaries than block huggers that collect toward the rear of the engine compartment clearing steering and suspension components. Shorter than full length designs provides excellent ground clearance. Heavy-duty 16 gauge 1 5/8" primaries with 3" collectors. Gaskets, bolts and collectors included.

Plain THU 8021.....\$199.95
 Coated THU 8021HC.....\$354.95

'55-'57 Chevy Car Headers

Big Block Available

Clears stock or 605 steering conversion and most motor mount conversions including those that pull the engine forward for HEI distributors. 1-5/8" primary tube with 2-1/2" collector these headers sweep back and downward but do not parallel the ground for easy exhaust system connection with plenty of ground clearance. Fits straight and most angle plug heads.

Plain THU 8055.....\$219.95
 Coated THU 8055HC.....\$364.95

Header Collector Flange Nuts

Wide base flange nuts distribute the clamping force closer to the collector center weld where the real sealing to the gasket takes place and prevents bending of the collector flange ears. Because of the shape of these nuts they also hold themselves when tightening or loosening the collector bolts. Sold in full sets of (6) flange nuts with fine thread 3/8" bolts & lock washers.

Zinc Coated..... AFO HFN\$29.95
 Chrome..... AFO HFN-C\$39.95

Weld-In Oxygen Sensor Bung

Steel material bung with common 18mm x 1.5 thread for welding into your collector if retrofitting to an fuel injected engine.

Weld-In Oxygen Sensor Bung SRS 992 \$7.95

ARP 5/16" Wrenching Header Bolts

All Bolt Kits Listed Have 3/8"-16 Threads

Miniature headed bolt uses a 5/16" wrench. With this smaller size it is most likely that you can use a boxed end wrench to tighten all your header bolts. SB Chevy uses 12 bolts, most other engines use 16 bolts because each exhaust port has two bolts. Most aluminum cylinder heads are drilled deeper and can use the 1" length. Small O.D. stainless flat washers included.

Exhaust Wrap & Locking Ties

Woven cloth type exhaust wrap has many applications. Wrap a section of exhaust to reduce unwanted heat radiating in to passenger compartment, to protect under floor master cylinders, batteries, electric fuel pumps, fuel tanks, etc. Wrap has blue indicator line sewn 1/4" from edge to aid in proper wrap overlap. Held to pipe with hose clamps or locking ties.
