## Universal Gauge Wiring Kit

Very versatile kit includes eyelet and spade connectors to fit any manufactures gauges. Color-coded and printed wires with a color-coded wiring schematic to make sense of gauge cluster wiring. This kit also includes indicator light and programmable speedometer wiring to disconnects and has wiring for not only the senders but the gauge lighting system between all the gauges. Also includes an expansion plug for more than the traditional 6 gauges.

Universal Gauge Wiring Kit..... AAW 500505 ..... \$78.95

## Indicator Lights

12 Volt lights are held into drilled hole by plastic light body design. Small light is L.E.D., large light is incandescent bulb. All have 6" leads.

**Small** - 3/16" Bezel dia. • L.E.D. measures 1/8" dia. • Drill 5/32" hole.

**Large** - 3/8" Bezel dia. • Lens measures 1/4" dia. • Drill 5/16" hole.

## 12 to 6 Volt Reducers

### For Gauge Use Only / One Reducer Per Gauge

Using 6 volt gauges in your 12 volt car? This simple bolt on reducer to make them work together. Attach the reducer to the back of the gauge, ground the wire off of it and run your 12 volt power source to the post on the reducer. Works on fuel, oil pressure, and water temperature gauges.

You may use the stock 6 volt sending units with this reducer. Each ..... VIN SR-10606 ..... \$16.95

## Low Voltage Warning Sensor

**Recommended for Use on Fuel Injected Vehicles - Works With 1-Wire Alternators**

**RON FRANCIS**  
**WIRING**

Low voltage sensor monitors the vehicles charging system and will illuminate a dash mounted warning light if the voltage drops below approximately 11 volts. A "warning" light is far more visible and attracts your attention much faster than a gauge. Box measures only 1-1/8" X 1-1/8" X 1/2".

Low Voltage Warning Sensor..... RFW LS-11 ..... \$27.95

## Power Plug Receptacle

### NOT Cigarette Lighter Receptacle

12-Volt power plug dock for cell phone chargers, temporary wiper motors, etc. Plug is rated at 15 amps and comes with under dash mount bracket and snap cap. Power Plug Receptacle..... SRS PP-73..... \$12.95

## Split Sleeve Wire Loom Covering

Split sleeve covering is ideal because it self-closes to try to keep its shape and has 25% edge overlap allowing coverage around harnesses with pre-installed plugs or connectors and splices. Covering does not require additional ties or loops to keep wires retained.

## Super Bright Blue L.E.D. "Illuminator" Light StreetWorks

An L.E.D. that's bright enough to use for illumination. Use this small light to light up the glove box, ash tray, etc. This light is too bright to use as an indicator light. .156" hole  
Bright Illuminator L.E.D. Light (Ea.) ..... STW L18BRB-5/32 .....\$13.95

## Glove Box Light & Switch Kit (All-In-One)

Simple plunger style switch with integrated light socket all as one unit. Replaceable bulb and wires included for power and ground. Cute kit!

Glove Box Light & Switch Kit ..... AAW 500147 ..... \$18.95

## Trunk / Under Hood Light Kit

Automatic light kit features internal switch to turn light on and off depending on angle of assembly. Supply power from your running light circuit and bend mounting tab to adjust on / off angle. Body must be grounded.

Trunk / Under Hood Light Kit ..... AAW 500143 .....\$24.95

## Cigarette Lighter

Aluminum handled cigarette lighter requires 7/8" hole and a circuit that will handle 15 amps continuous. 2-1/2" required for mounting depth.

Aluminum Cigarette Lighter..... YOG CIGLT ..... \$24.95

## Power Port Plug StreetWorks

Simple aluminum plug with O-ring to hold it in the power port opening when your not using it. Plug comes with 3/16" stud for you to install a dash knob of your liking. Dash knob not included.

Power Port Plug ..... STW B23P .....\$19.95

## Highway 15 & Highway 22 Series Wiring Harnesses

### Complete Universal Street Rod Wiring Harnesses

#### Dash Ignition, Floor Dimmer & Headlight Switches Included

Modular design wiring systems with convenient front (one) side only wire loading into fuse panel. Wires affix into panel with a self locking steel screw down connection. Simply cut, strip, insert and screw down to terminate the connection. Panels are over-engineered utilizing bus bar technology, anti-push back locks and steel internal retainer springs to keep fuse lugs tight are only small part of the features built into these panels. Fuse panel protection with 175 amp stud mounted fuse block located next to the starter allows multiple high amp accessory tie-ins without stacking

on starter solenoid post. Color coded printed wire with easy to follow color instructions.

**Complete Wiring for:** Column turn signal wiring with connectors for GM and aftermarket columns using 4-1/4" or 3-7/8" turn signal plugs. Ignition wiring for dash mounted switch or column plugs for steering columns with switch also included. GM "SI" alternator boot and terminal for internally regulated or "one-wire" charging systems with heavy 8 gauge battery and panel feed wire. Included headlight switch and floor dimmer switch with complete wiring for all lighting circuits including dome and gauge dimming circuits. Complete gauge, turn and high beam indicator wiring with sender wiring all through supplied disconnects to allow easy gauge cluster removal. Plus accessory wiring including wipers, radio, horn and air conditioning.

**Highway 22 Additional Features:** 2 spare battery (always hot) accessory connections, 2 spare ignition hot accessory connections, 40 amp fan relay on fuse panel with ground side switching to coincide with popular temp and pressure switches. Fuse panel mounted "battery" and "accessory" terminal posts for connection of high amp accessories right off the panel. Separate fuel pump circuit (recommended for fuel injection), battery and ignition electronic fuel injection accessory circuits.

Highway 15 Harness ..... AAW 500703 ..... \$369.95

Highway 22 Harness ..... AAW 500695 ..... \$459.95

## Power Plus 13 & Power Plus 20 Integrated Fuse Box Systems

### Headlight & Floor Mounted Dimmer Switch Included

For those that prefer a fuse panel with the wire already connected to the fuse panel *American Autowire* offers these very popular integrated fuse panel harness. Unlike the competitors these panels are complete with headlight and dimmer switches and full schematics to lay it all out so anybody can install. GM color coded and ink-jet printed.

**Complete wiring for:** Column with connectors to adapt GM and aftermarket columns using 3-7/8" or 4-1/4" turn signal plugs. • Gauge wiring including senders with gauge cluster disconnects. • Alternator connectors for GM "SI" series internally regulated or "One-Wire" alternators. • Lighting for all running lights, brake and directional lights, license light and third brake light. • Accessory wiring for courtesy light and dome lights. • Radio with battery and accessory leads. • Dimmer wiring for floor or column wiring. • Ignition wiring for GM column mounted (connectors included) or dash mounted switch. • All fuses, flashers and relays. • Plus much, much more.

Power Plus 13 System ..... AAW 510004 ..... \$269.95

Power Plus 20 System ..... AAW 510008 ..... \$299.95

## Classic Update Series Wiring Harnesses

### Make & Model Specific - Designed For Use With Aftermarket Components - "Street Rodded" Harnesses

These kits accommodate all of the popular aftermarket accessories available to bring your projects electrical system up to date. Working with major equipment manufacturers in air conditioning, electric wipers, gauges, and steering columns *American Autowire* has engineered kits that easily interface with these aftermarket accessories as well as nearly all reproduction lighting assemblies. Harnesses yield complete flexibility in engine compartment and body wire routing for that custom installation. Kits include specialized components such as bolt-on fuse box mounts, headlight

switch collar nuts, correct lighting sockets, weatherproof boots, specialized grommets etc. when applicable to fit your application. The best components and detailed instructions.

## 12 Circuit Fuse Panel Only

**PAINLESS**

Use this 12 Circuit OEM style pre-wired fuse block to replace your existing fuse block or as a starting point for custom wiring. All you have to do is terminate your circuit wire and attach it to the fuse block. Pre-wired and labeled for the following circuits: A/C-Heat, gauges/dash instruments, brake lights, headlights, coil, horn, dome lights, radio, electric fan, turn signals, hazards, wipers and alternator. Kit includes: mounting bracket, fuses, flashers, horn relay, terminals and full instructions.

12 Circuit Fuse Panel Only ..... PPP 30001 ..... \$149.95

## Accessory Fuse Panels

**SACHSE**  
*Red Shop*

Simple fuse panels for added-on accessory circuits. Power input lead fits onto #10-32 stud. 1/4" male spade connectors right off the side of each fuse for that circuit. Maximum current for all circuits 100 amps. Fuses not included.

6 Circuit..... 3-3/8" X 2-1/2" ..... SRS 4650 ..... \$16.95

8 Circuit..... 3-3/8" X 3-1/8" ..... SRS 4651 ..... \$19.95

## Auxiliary Fuse Block Bus Assembly

Features 6 fuse outlets rated at 30amp each. Side ring terminals, plastic cover and heavy duty feed wire included. Block measures 1-3/8" X 4-7/8". Assembly is rated at 80amp maximum.

Auxiliary Fuse Block Buss Assembly ..... AAW 500383 ..... \$34.95

## Terminal Blocks

Double row blocks are very high quality with capability of high amperage and include plated brass screws. Jumpers designed to interconnect terminals on the blocks.

4 Gang Block..... SRS 354 ..... \$4.95

6 Gang Block..... SRS 356 ..... \$5.95

10 Gang Block..... SRS 360 ..... \$8.95

Jumpers .....Quantity of 5 ..... SRS 365 ..... \$1.75

## Ground Wire Strip

**RON FRANCIS**  
**WIRING**

The best way to create common grounds for fiberglass cars and metal cars if you want to do it right. Heavy printed feed wire is connected to the battery for best results. Features 10 connection points for smaller grounds and 2 studs for larger connections.

Grounding Terminal Strip ..... RFW GW-15..... \$31.95

## Power Junction Block

Sometimes you need a little more room to run the power wires for all of the cool accessories you've added to your car. Just mount this junction block away from any heat source and connect your power source to it. This junction block has two 8mm studs to accept 5/16 ring terminals and 3 #8 screws for smaller items. It is much easier to wire your cooling fans, radio, or door solenoids to this than to the starter post...

Power Junction Block ..... RFW JB-57..... \$34.95

## 22 Wire Bulkhead Disconnect Kit

Weather Pack style disconnect allows (10) 12 gauge and (12) 18-14 gauge wire connections. Disconnect bodies are indexed to insure correct alignment and feature waterproof seal for the 'body' side along with a waterproof seal where the two come together. Includes appropriate crimp-on wire terminal ends with individual wire seals and locking 'combs' insure the terminals connect with the mating bulkhead by not allowing them to back out from their seated position. Single 1/4" bolt that secures the halves together not only keeps the final assembly tight but during installation pulls the two together and when loosened it also separates the two eliminating possible damage by external force. 2-1/2" tall X 3-5/8" wide (stud ears) & requires 2" hole.

22 Wire Bulkhead Disconnect Kit ..... AAW 500666 ..... \$41.95

## Through Firewall Wiring Grommet & Disconnects

Kits feature rubber grommet that holds one side of the harness plug securely to the firewall/panel and comes with mating connector plug. All kits include appropriate crimp on terminals that lock into place in the disconnect plugs.

4-Wire ..... 1-1/4" Mounting Hole..... AAW 500548 ..... \$15.95  
6-Wire ..... 1-3/8" Mounting Hole..... AAW 500564 ..... \$14.95  
8-Wire ..... 1-1/2" Mounting Hole..... AAW 500547 ..... \$14.95  
9-Wire ..... 1-3/4" Mounting Hole..... AAW 500566 ..... \$17.95

## Firewall Harness Cover

Universal wiring harness cover hides the bundle of wires as it comes through the firewall. Cover is a two piece design with back piece attaching to the firewall and polished ball milled cover simply attaching to it after all the wires are pulled through. Flush mounting allen head hardware included. 2-1/4" O.D. x 1-1/4" I.D.

Firewall Wiring Harness Cover ..... PRR 6060 ..... \$49.95

## Quick Connectors

For Use With 18-14 Gauge Wire

Plastic connector housings lock together and are indexed so that they fit together only one way. Complete with brass terminals that lock into the housings.

1 Wire..... AAW QCK-1 .....	\$6.00	4 Wire..... AAW QCK-4.....	\$9.00

## GM Column Turn Signal Connector Set

**American  
Autowire**

3-7/8" and 4-1/4" connector set allows the correct terminal and connector body connection to any 1969 or newer GM steering column without the use of exposed terminals or wiring. Kit includes both male and female plugs and all terminals.

GM Column Connector Kit..... AAW 500428 ..... \$9.95

## GM Switch Connector Plugs

**American  
Autowire**

Headlight switch plug: Female 8-way one piece plug with terminals fits GM headlight switch. Column mounted ignition switch plugs: Two-piece plug fits GM column mounted ignition switch complete with terminals. Dash mounted ignition switch plug: "V" shaped 6-way plug with terminals.

Headlight Switch Plug .....(Left) ..... AAW 500189 ..... \$5.95

Column Mount Ignition Switch Plugs (pr) .....(Center) ..... AAW 500257 ..... \$7.95

Dash Mounted Ignition Switch Plug .....(Right) ..... AAW 500287 ..... \$5.95

## Toggle Turn Signal Switch

**American  
Autowire**

Three position toggle switch can be mounted just about anywhere. Flip it toward the side you want to flash, then flip it back to the center to cancel. Special switch controls turn signal and brake circuits in rear, no extra bulbs required.

Toggle Turn Signal Switch..... AAW 500148 ..... \$29.95

## Clamp-On Turn Signal Switch

Clamp-on turn signal switch for early steering columns that didn't have turn signals. Switch also features emergency flasher provision and built in lighted green indicators for both left and right signal plus a red indicator for emergency flashers. Switch will require external flasher, not provided. Instructions with wiring schematic included. Total length measures 7" from where it would mount to column to end of flasher arm.

Clamp-On Turn Signal Switch..... VIN U-13340-TS..... \$28.95

## Emergency Flasher Switch

**American  
Autowire**

Add-on four way flasher switch. Includes instructions for easy hookup. Requires separate flasher from turn signal flasher. Mounts in 7/16" diameter hole. Includes black plastic knob. Shaft will fit knobs with 10-32 thread.

Emergency Flasher Switch ..... AAW 500221 ..... \$48.95

## GM Column Tilt & Turn Signal Levers W/Push Buttons

### Levers Have True On/Off Switch – Momentary Type Available

**StreetWorks**

Stainless steel shaft with aluminum knob levers feature a true two wire on/off switch to control just about any on/off function or even on/on features such as headlight dimmer control. Included 40A relay is a 5 wire type which has a normally closed and normally open circuitry. Give us a call and we'll be happy to help you wire this into whatever function you are wanting to control.

Turn Signal Lever (Early GM W/Single Screw Retention).....STW L43D..... \$73.95

Tilt Lever (GM Type – 1/4"-28 Thread) .....STW L33D..... \$64.95

## Chrome "CS" Alternators - NEW! - Not Reconditioned

### A Must For Fuel Injection - Recommended For All Cars With High Electrical Demands

In addition to a high total amperage output these CS case alternators have a higher idle amperage output necessary for use on fuel injected engines. Alternators offered in a true 3-wire OR 1-wire charging configuration and are NOT interchangeable between the two different charging systems. These alternators are the highest quality alternators we carry but as everything, if you want quality it comes at a price.

#### 1-Wire Alternators

105 Amp.....	PWM 178021.....	\$204.95
140 Amp.....	PWM 378021.....	\$224.95

#### 3-Wire Alternators\*

PWM 17802.....	\$199.95
PWM 37802.....	\$219.95

\* 3-Wire alternators are only available out of the box with a serpentine pulley installed. If you need a V-belt application you will need to purchase a V-groove pulley and change it. V-belt pulley if needed for 3-wire alternators (Chrome) .....PWM 110 ..... \$21.95

## Chrome "SI" Alternators

### Internal (3-Wire) OR 1-Wire Charging

Alternators feature unique wiring to charge in either standard internal (3-wire) or customized 1-wire charging systems. Alternator does charge in either a 3-wire or 1-wire system however it will have a slight battery draw. We recommend a battery disconnect switch to prevent battery drain down. Alternators are reconditioned and include chrome V-belt pulley and chrome cooling fan.

100 Amp.....	SRS 7127 .....	\$109.95
140 Amp.....	SRS 7140 .....	\$159.95

## High Amp Alternator Kit

This kit was designed to hook up any high output 1 wire or GM SI series internally regulated alternator and features a heavy 8 gauge fused power lead. It can also be used to hook up any CS, CS-130D, of Ford Gen III internally regulated alternator with the use of an alternator conversion kits.....AAW 500875 .....\$35.95

## GM External Regulator to Internal Regulator Charging Conversion Kits

Simply unplug the vehicles wiring harness from the external regulator and install the supplied rubber jumper plug. Click the alternator adapter into the existing alternator wire harness and then install the other end into the alternator.

To "SI" Type Alternators.....	AAW 27555.....	\$20.95
To "CS" Type Alternators .....	AAW 37787.....	\$28.95

## Alternator Wiring Aids

Adapter Plug - GM "SI" Harness to "CS" Series Alternator .....	AAW 37796 .....	\$24.95
"SI" Diode Kit - Easy Fix When Experiencing a Power Backfeed Problem.....	AAW 500541 .....	\$14.95
Rubber Stud Boot - Seals Over Battery Stud Insulator.....	AAW 500057 .....	\$4.95
Int. Regulator Plug - Male Plastic Plug Fits GM "SI" Series Alternators .....	AAW 500201 .....	\$4.95
Ext. Regulator Plug - Male Plastic Plug For GM External Regulator Alternators .....	AAW 500198 .....	\$3.95

## Battery Tender

12 Volt - Every Vehicle That Is Left To Sit Weeks On End Should Have One!!

A battery can lose 1% of its charge per day if it sits unused.

The *Battery Tender* maintains a constant full charge without the damaging effects of "trickle" charges. The *Battery Tender* monitors your battery by automatically switching from charging to storage keeping it always fresh and ready.

### Battery Tender Jr. (Pictured Right)

0.75 amp • 3-Step Charging (Initialization, Bulk Charge, Float/Maintenance) • Spark Proof • Fully Automatic Switching from Charge to Float • Short Circuit & Reverse Polarity Protected

*Battery Tender Jr.* ..... TND 021-0123 ..... \$29.95

### Battery Tender Plus (Pictured Left)

1.25 amp • 4-Step Charging (Initialization, Bulk Charge, Absorption Mode, Float/Maintenance) • Spark Proof • Temperature Compensated • Fully Automatic • Short Circuit & Reverse Polarity Protected • 72 Hour Timer

*Battery Tender Plus* ..... TND 021-0128 ..... \$54.95

## Battery Jumper Post Bracket

Steel, zinc finished bracket features correct shaped "DD" holes to accept remote battery jumper posts (sold separately). This bracket is a real time-saver if you've ever tried to make these odd shaped holes, this hole shape is necessary to keep the post from turning as you tighten the post locking nut. Self-threading 1/4" mounting hardware

included. USA made.

Battery Jumper Post Bracket..... SRS 5000 ..... \$19.95

## Battery Jumper Posts

Jumper posts allow remote access to battery power for jump starting or charging. All are housed in insulated plastic base and feature 3/8"-16 solid brass studs.

Positive Jumper Post (Red)..... SRS 5010 ..... \$16.95

Negative Jumper Post (Black) ..... SRS 5011 ..... \$16.95

## Battery Pass-Through Studs

Battery cable pass-through studs are the safe way to pass battery current through a bulkhead.

Red Housing..... SRS 5008 ..... \$13.95

Black Housing..... SRS 5009 ..... \$13.95

## 90° Battery Cable Lugs

Battery cable lugs have a 90° bend with 3/8" hole. Great for use on starter terminals or numerous other applications. Fits 1-gauge battery cable.

90° Cable Lugs (pr) ..... SRS 2185 ..... \$5.50

## Battery Drop-Down / Out Boxes

Design allows the battery to drop down while still hanging in the frame bracket for service or you can remove the battery box from the frame bracket completely. Mounting bracket has a slot cut along the back side to allow it to be installed over a frame mounted brake line.

Group 26 (L: 8-3/16", W: 6-13/16", H: 7-3/4")

Small Battery (Group 26).....  
Group 24 (L:10-1/4", W: 6-13/16", H: 8-7/8")

Large Battery (Group 24).....

### Black

### Stainless Steel

CPP BDB-S26.....\$129.95

CPP BDB-S24BK .. \$109.95.....

CPP BDB-S24.....\$129.95

## Optima Battery Tray

Made of billet aluminum this battery tray is designed for the popular *Optima* batteries. The tray is contoured on the bottom to the shape of the battery and the mounting strap is made to clear the battery posts and comes with stainless hardware. Available polished or black anodized and clear coated.

Black ..... BLT 248910.....\$79.95  
Polished..... BLT 248915.....\$99.95

## Battery Cable Kits

American Autowire battery cable kits feature the lead die cast top post terminal has a molded end with a steel ring insert which enables you to tighten the connection without the risk of cracking or breaking the terminal, making this a tight connection minimizing corrosion and voltage drop. All kits include proper battery cable ends (lugs) as well as a crimping tool to make your battery cable connections as professional as possible.

### Side Post Battery

Under Hood Battery (6' Cables) ..... AAW 500726 .....\$89.95

Trunk Mounted Battery (18' Cables) ..... AAW 500724 .....\$139.95

### Top Post Battery

AAW 500725 .....\$99.95

AAW 500723 .....\$149.95

## Ground Straps

Braided ground straps have 3/8" eyelets on both ends.

12" Long ..... SRS GS12 .....\$14.95

18" Long ..... SRS GS18 .....\$14.95

## Battery Mat

Soffseal battery mat traps & neutralizes battery acid. Measures 8" x 12" x 3/16" and can be cut with heavy duty scissors. Black in color.

Battery Mat .....SOF BM1 ..... \$8.95

## Lifeline Battery Disconnect Memory Retention Module

Switch  
Not  
Included

This allows disconnect to be shut off while supplying a continuous 1 amp battery circuit to the rest of the electrical system. Devices requiring battery power for memory retention can be serviced while the rest of the system is protected from high current loads. Any attempt to draw more than 1 amp will cause the module circuit to open until the high current draw is removed and the module will reset automatically. .... AAW 500778 ..... \$24.95

## Master Disconnect Switch

Extra heavy duty design. Protects against theft and electrical failures. Includes rubber insulator boots which cover the stud and nut. Insulated rubber boots also available separately.

Master Disconnect Switch (Boots Included) ..... AAW 500003 ..... \$28.95

Insulated Rubber Boots (Pair) ..... AAW 500735 ..... \$4.95

## Battery Disconnect Switches

Great for use as an antitheft device or to isolate your battery while charging.

 Switch with removable key is light duty and should be used in relatively low amperage applications.

Heavy Duty Disconnect ..... Metal Cased ..... VIN A-14300-D ..... \$26.95

Disconnect W/Key ..... Plastic Cased ..... VIN SR-14300 ..... \$12.95

## 175 Amp Mega-Fuse Assembly

The demands on some cars electrical systems today are tremendous and require high amp charging systems to maintain therefore a higher amp fuse will also be necessary. Insulated housing has provision for 4 wire exits and is hinged to protect fuse and exposed electrical connections. Measures 1-5/8" X 5-1/4" (W/mounting ears) X 1-7/8" tall. 4 ring terminals included.

Mega-Fuse Assembly ..... AAW 500689 ..... \$18.95

Replacement 175 Amp Fuse Only ..... AAW 500827 ..... \$6.95

## 60 Amp Maxi-Fuse & Holder

Strong Nylon fuse holder mounts with single screw or can clip to the top of sheet metal. Kit comes complete with 60 amp fuse and white opaque slip over cover. #10 screw connections for ring style terminals.

60 Amp Maxi-Fuse Assembly With Cover ..... SRS 5449 ..... \$18.95

## Programmable Electric Fan Controller

Triggers From Your Existing Water Temp Gauge Sender 

Controller works with most existing electronic water temp gauges operating from the single-wire temperature sending unit already installed or a dedicated sending unit can be used. Features fully programmable "fan on" and "fan off" temperatures to suit any application or preference and a full digital LED readout for displaying temperature readings and maintaining simple installation. Recommended mounting inside the cab of the vehicle or alternate dry environment. The use of a second relay (not included) will be required for dual fan or two speed fan operation. One 70 amp relay included.

Programmable Electric Fan Controller ..... DAK PAC-2750 .... \$119.95

## Adjustable Electric Fan Thermostat

### Must Be Used With Electric Fan Relay Kit

Thermostatic switch features probe with 1/4" npt fitting to install in lower radiator tank when drain cock is removed. Adjustable knob allows you to dial when the fan comes on. Allows temperature settings between 180° and 240°. Can be used in conjunction with trinary safety switch.

Adjustable Electric Fan Thermostat..... VAA 24675-VUT.....\$29.95

## Electric Fan Adjustable Thermostat Cover

### Fits Above *Vintage Air* Adjustable Thermostats Only

Satin finish aluminum cover slips over adjustable thermostat. Insulated wire end terminals included.

Electric Fan Thermostat Cover ..... VIN CL-8658-W .....\$9.95

## Electric Fan Temperature Switches

### Used For Triggering Relay Systems – *Vintage Air* Relay Harness Recommended

These are simply switches that turn on and off at the temp ranges shown. These switches have only one 1/4" spade connector so they will connect the wire attached to it to ground when above it is above its temp setting. The wiring harnesses listed right include wiring instructions for this "ground side" switching. Both switches have 3/8" npt threads.

190 Degree On / 170 Degree Off ..... MPF MFA108.....\$19.95

200 Degree On / 180 Degree Off ..... MPF MFA109.....\$19.95

## Electric Fan Relay & Wiring Kits

### Relay Kits Only - Requires Switch To Activate Relay

A relay is the 'middle man' between the switch and the electric fan. The switch, be it adjustable thermostatic or toggle, simply turns on and off the relay. The relay is what handles the high amp load of delivering the electricity to the fan motor. By using a relay your switch will last longer and the system is much safer.

40 Amp Relay Kit (Most Single Fan Set-Ups) ..... AAW 500479 .....\$21.95

70 Amp Relay Kit (Most Dual or H.D. Fan Set-Ups).... VAA 23102-VUW.....\$39.95

## Electric Fan Wiring Systems

All *Ron Francis Wire Works* systems include 30 amp fuse and high quality relays to carry the high amperage demands of todays electric fans.

**Temperature Control** - *Ron Francis* offers kits with 3/8" NPT sender to sense water temperature and turn the electric fan on and off automatically.

**A/C Request** - Kits with A/C request will (in addition to the temp sensor) turn the electric fan on when the A/C compressor is engaged.

### Temperature Switch Range

### A/C Request

175 Degree On / 160 Degree Off ..... Yes ..... RFW AR-23 ..... \$86.95

175 Degree On / 160 Degree Off ..... No ..... RFW AR-29 ..... \$70.95

## Aluminum Accented Face Nuts

Machined aluminum, satin finish face nuts have black O-ring accent around outer perimeter. Nuts simply thread on to your switches for a completed look to your dashboard. These may fit other manufacturers switches than what is listed.

Headlight Face Nut.....	Fits AAW 500341.....	STW B-HLSN.....	\$11.95
Ignition Switch Face Nut.....	Fits AAW 500006.....	STW L47N .....	\$11.95
Wiper Switch Face Nut.....	Fits AAW 500146.....	STW B-WSN .....	\$11.95

## Ignition Switches

Two switches to choose from. Switch pictured left features chrome face nut and includes common plastic plug with one way wire ends to hold wires into plug. Pictured right switch features studs with nuts for wire installation and aluminum face nut. Both switches have "accessory" position and include two keys.

With Modular Plug (Pictured Left).....	AAW 500456 .....	\$24.95
With Studs (Pictured Right).....	AAW 500006 .....	\$15.95

## '55-'57 Chevy "Updated" Ignition Switch & Key Cylinder

Updated to provide power to the ignition circuit when in the "crank" position, the original did not. This is a must if you've changed the ignition system or starter to something post points. Includes new chrome nut, spacer and connector. Switches do not include lock cylinder but will accept original.

Updated Ignition Switch.....	'55-'56.....	AAW 500670 .....	\$34.95
Updated Ignition Switch.....	'57 .....	AAW 500675 .....	\$34.95
New Lock Cylinder W/Keys .....	'55-'57 .....	AAW 500672 .....	\$18.95

## Wiper Switch

2 Speed rotary style switch has "Park" position. Switch uses 1/4" female spade terminals. Black plastic knob with wiper logo included or can be replaced with knobs with 3/16" hole and set screw.

Wiper Switch .....	AAW 500146 .....	\$17.95
--------------------	------------------	---------

## Push / Pull Switch

Simple heavy duty on/off switch. Switch accepts ring terminals. Chrome knob included (cannot be removed).

Heavy Duty Push Pull Switch .....	AAW 500322 .....	\$21.95
-----------------------------------	------------------	---------

## 2 Speed Switch (Can Be Used For Heater or Wiper)

Push / pull type switch with OFF-LO-HI positions. Switch has built-in resistor and accepts ring style terminals. Yellow plastic knob included but can be replaced with 10-24 threaded knob. Requires 7/16" hole for installation.

2 Speed Switch .....	AAW 500144 .....	\$24.95
----------------------	------------------	---------

## Dimmer Switch

Switch Only .....	AAW 500042 .....	\$7.95
Connector & Terminals.....	AAW 500286 .....	\$3.95

## So-Cal Electric Switches

More Switches Can Be Found In The Electrical Section.

*So-Cal Speed Shop* has assembled a quality selection of switches with the right aesthetics to compliment your hot rod. Sourced from a number of manufacturers, they have been fitted with *So-Cal*'s own stylish Art Deco knobs and bezels.

Push Operated Horn Switch (A) .....	SOC 60766 .....	\$29.95
GM Type Headlight Switch (B) .....	SOC 60754 .....	\$39.95
Two-Speed Wiper Switch (C) .....	SOC 60750 .....	\$29.95
Ignition Switch W/Keys (D) .....	SOC 60752 .....	\$29.95
Push/Pull On/Off Switch (E) .....	SOC 50447 .....	\$19.95
Keyless Ignition Switch (F) .....	SOC 60753 .....	\$29.95
Headlight Switch W/Built-In High Beam (G) ...	SOC 50467 .....	\$39.95

## Synergy Color Accented Switches

All (Except Ignition) Include Black, Blue, Tan & Red Accent Rings

**RON FRANCIS**  
**WIRING**

Accent rings slip on to a groove cut in the knob and switch face nut. Ignition switches are offered a specific color because the keys are molded in color (two keys included).

GM Headlight Switch w/ Modular Plug (A).....	RFW HL-07 .....	\$41.95
Headlight Switch W/Built-In High Beam (B)....	RFW HL-16 .....	\$39.95

## LED Shift Indicator Displays

### 2-Part System – Sender & Display Indicator Required

*Lokar's* shift indicator features a cable operated sensor to allow flexibility of mounting to a variety of locations such as on the transmission, on the frame, to the floor pan or inner fender etc. This sensor module utilizes an easy to use programmable solid-state circuit board with built in neutral safety and backup light circuits. Compatible with all *Lokar* and most other shifters.

### Sensor Kits (Sending Units)

GM – Transmissions.....	LKR CINS-1797....	\$173.95
Ford – C4 & C6 Transmissions .....	LKR CINS-1799....	\$173.95

## Torque Converter Lock-up Kit

### RON FRANCIS CABLE DRIVEN SPEEDOMETER TRANSMISSIONS ONLY WIRING

Electronic system to lock and unlock converter by vehicle speed the way GM intended, not by vacuum. Kit reads vehicle speed through a sensor installed between the transmission and the speedometer cable. Adjustable speed setting but preset to lock the converter at 42-47 MPH and unlocks below that speed or when the brakes are applied. Connects into the factory pin plug in transmission. Kit can be used with or without computer.

200R-4, TH-350 (W/Converter Lock-Up) & 700R-4.....	Square 4-Pin .....	RFW TC-70 .....	\$195.95
--	--------------------	-----------------	----------

## Neutral Safety (or Back-Up) Switch Kit

### Will Work With *Lokar* Column Shift Linkage Kits.

Kit can be installed for EITHER neutral safety OR backup light switch NOT BOTH. Kit includes adjustable bracket that mounts to transmission pan, switch, long pan bolts and instructions.

GM TH-350, TH-400, 700R-4.....	LKR BL-1400U .....	\$35.95
--------------------------------	--------------------	---------

## Push Button Neutral Safety Switch

### Replacement Neutral Safety Switch for *Lokar* and *Gennie* Shifters

Switch is normally open meaning that the button has to be pushed in to achieve continuity between the terminals. Needs only slight movement to activate.

Push Button Neutral Safety Switch.....	LKR S-68154 .....	\$18.95
--	-------------------	---------

## Under Dash Mount Brake Light Switches

The simple switch just controls the brake light circuit only. Multipurpose switch includes connectors for use with cruise control, transmission converter lockup or anything that requires a circuit interrupt when the brake is applied.

Simple Brake Switch (Left) ..... AAW 500097 ..... \$8.95  
 Multi-Purpose (Brake & Cruise / Converter Lockup Interrupt) ..... AAW 500145 ..... \$11.95

## Low Pressure Hydraulic Brake Light Switch

**Relay Recommended For Use With Halogen Taillights PAINLESS**

Low pressure activation between 20 to 50 psi compared to the stock switch which came on between 60 to 120 psi. Lower pressure means your brake lights come on sooner! Switch has 1/8" NPT connection and comes with low profile connection plug.

Low Pressure Hydraulic Brake Light Switch ..... PPP 80174 ..... \$15.95

## Brake Line "T" For Hydraulic Brake Switch

Brass "T" has 1/8" NPT port on the short side (leg) and offered for either 3/16" or 1/4" hard line with inverted flair on the through ends (run).

3/16" Brake Line ..... RFW BL-18 ..... \$14.95

1/4" Brake Line (2-Part T fitting - Not Shown) ..... RFW BL-25 ..... \$16.95

## Heavy Duty Push Button Brake Light Switch

**RON FRANCIS  
 WIRING**

Fully adjustable, waterproof and rated for high amps! This switch is the latest generation in brake light switches. Rated at a much higher amp rating than any other brake switch on the market this switch doe's not require a relay for most applications. Adjustable stainless bracket makes it easily adaptable to most manufactures pedal assemblies.

Heavy Duty Brake Switch ..... RFW SW-42 ..... \$32.95

## Adjustable Lever Type Brake Switch

**StreetWorks**

Waterproof switch features adjustable lever arm allowing for easier installation into just about any vehicle with under floor brake assembly. Includes stainless mounting hardware and terminal ends. If using halogen taillight bulbs a relay kit is recommended for use with this brake switch.

Adjustable Lever Brake Switch ..... STW L08 ..... \$24.95

## Lever Brake Light Switch

**Relay Recommended For Use With Halogen Taillights**

Lever style brake light switch is water resistant and can be used under the floor or in the engine compartment if necessary.

Lever Brake Light Switch ..... AAW 500098 ..... \$13.95

## Power Window Switch Crank Regulators

Regulators feature factory style splined shafts to accept your stock or aftermarket style window cranks. Mechanism features internal micro switches to control movement of the power window. Push or pull handle up and down to operate. Retains the appearance of factory manual windows while having the convenience of power windows. Available for early and late Ford, Mopar and GM applications. Measures 3" x 3" x 5/8" thick x 1-3/8" (shaft length). Sold in pairs. These are made in the U.S.A.!!!

Pre '49 Ford/Mopar.....	CAR EPWS-FM ....	\$139.95
Pre '49 GM .....	CAR EPWS-GM....	\$139.95
'49-up Ford & GM.....	CAR EPWS-FGM...	\$139.95

## Aluminum 3-Wire Switches

Can Be Used For Power Windows, Door Locks, Trunks, Etc...

**StreetWorks** 3-Wire switches require polarity-reversing relays (included) to control reversing motor operations. (Switches are available without polarity reversing relays at a lesser cost.) All switches include bezels, terminals, wire leads and quality instructions. Triple switch kit is primarily used for power windows and includes one single switch and one dual switch. All are satin finish and are non-illuminated but a "back lighting" kit is available, call for more information.

### Dimpled Rocker Switches

Rocker switch itself is taller than its frame and features small recesses in rocker to locate up and down positions.

Single Switch Kit.....	STW L39BOS.....	\$77.95
Dual Switch Kit .....	STW L39BOD ....	\$138.95
Triple Switch Kit .....	STW L39BOT.....	\$198.95

### Paddle Rocker Switches

Raised paddle in the center of the rocker similar to early OEM designs.

Single Switch Kit.....	STW L39BOSP.....	\$77.95
Dual Switch Kit .....	STW L39BODP ....	\$138.95
Triple Switch Kit .....	STW L39BOTP.....	\$198.95

## Illuminated Aluminum 5-Wire Switches

Can Be Used For Power Windows, Door Locks, Trunks, Etc...

**StreetWorks** Aluminum rocker switches are a 5-wire type which means they are internally polarity reversing and do not require external relays for reversing motor operation. Switch is very low profile from mounting surface and has two finger-tip recesses with small holes in the center allowing light to pass through. Switches mount

with small studs which attach to the back side of switch frame in "blind" holes so no mounting hardware is seen. All switch kits include terminals wire leads and the best instructions in the industry. Triple switch kit is primarily used for power windows and includes one single switch and one dual switch. Satin finish.

Single Switch Kit.....	STW L39-5BS .....	\$79.95
Dual Switch Kit .....	STW L39-5BD .....	\$144.95
Triple Switch Kit .....	STW L39-5BT .....	\$209.95

### Store Hours:

Monday through Friday 8:00 am to 5:00 pm  
Saturday 9:00 am to 1:00 pm  
Central Standard Time

### Windshield Mount Antenna Best Choice for Steel Cars

12-Volt amplified antenna is designed to be placed in the windshield and because of its small size is easier hidden behind a rearview mirror. Totally non directional, receives signal from 360 degrees. Antenna head measures 7/8" X 7/8" X 4" and features 8' lead. Windshield Mount Hidden Antenna ..... SRS 850 .....\$59.95

### Hidden Antenna More Popular To Hide In Fiberglass Cars

In a fiberglass car this antenna can be placed above the headliner or under the dash close to the cowl top. This antenna too is designed to be affixed to the windshield or rear window but because of its larger, unattractive size most people had rather not put this one on the glass. Antenna requires 12 volt power and must be grounded. Head measures 5/8" X 3/4" X 14-3/4" with 8' leads. Hidden Antenna ..... SRS 860 ..... \$39.95

### Chrome 12 Volt Horns

Dual horn set has one high and one low tone horn. Chrome metal grille and chromed plastic body covers. Mounting brackets included. Sold in pair sets. Dual Chrome Horns ..... SRS 5230 ..... \$34.95

### Universal 40 & 70 Amp Relay, Base & Pigtail kit

Relays features a single pole, double throw, 5-terminal design. 12 volt 40 or 70 amp relay, mounting bracket and a 5 wire wiring harness with color coded leads.

Universal 40 Amp Relay ..... SRS 5591 ..... \$9.95

Universal 70 Amp Relay ..... DAK RLY-3 ..... \$29.95

### Universal Waterproof 40 Amp Relays

The waterproof aspect of this relay makes it perfect for use under the hood, on the frame or any place where the weather and elements might affect it. Offered with 10' of color coded hi-temp XLPE coated wire installed with proper crimps and waterproof seals in relay base or in kit form with base, loose wire terminals and wire seals only.

Relay With 10' of Wire Installed.....AAW 500093 .....\$55.95

Relay With Base & Terminals.....AAW 500448 .....\$22.95

### Dual Relay Pack

#### Used Primarily for Polarity Reversing

Dual 30 amp relays installed in a single base with color coded pigtails. Dakota Digital includes an easy to understand instruction set which explains relay logic and shows how to connect this relay pack to perform a number of common tasks.

Dual Relay Pack..... DAK RLY-2 ..... \$24.95

## Oval Interior Lights

Lights bodies are machined from billet aluminum and feature LED lighting to provide you with a soft white light instead of the dingy yellow light compared to others. Your choice between Radius

Angled Edge / Radius Edge

Edge design and Angled Edge version with a 30 degree angle cut bezel. Measures 5-1/4" long X 2-1/8" wide X 3/4" deep (behind panel)

Angled Edge ..... TRI OIL30P ..... \$59.95

Radius Edge..... TRI OILP ..... \$59.95

## Elliptical Dome Light

### Paul Atkins Signature Series

This elliptical dome light features a chrome plated die cast bezel and a frosted plastic lens. Measures 4-1/2" long by 2" wide and is 3/4" deep.

Elliptical Dome Light ..... CMW DM-402 ..... \$57.95

## Round Dome Lights

### Light With Switch Will Not Work With Door Jam Switches

Chrome bezel and frosted white glass lens 4-7/8" O.D. X 3/4" (above headliner). Light without switch can be wired to headlight switch and jam switches (with relay) so it comes on through the ground circuit. Dome light with switch controls the power wire so it can only be turned on and off by the switch.

Without Switch..... VIN A-13771 ..... \$45.95

With Switch..... VIN A-13771-WS..... \$52.95

## Interior Lights

Aluminum interior lights can be used in the doors panels, kick panels or wherever you want a classy interior light. All expertly polished.

### 2 White Lenses

### White & Red Lens

Oval ..... BLT 60320 ..... \$38.95 ..... BLT 60420 ..... \$38.95

Rectangular.... BLT 60120 ..... \$38.95 ..... BLT 60220 ..... \$38.95

Oval = 4" X 1-3/4" X 1-1/2" Deep / Rect. = 3-5/8" X 1-1/2" X 1-1/4" Deep

## Courtesy Light Kit

Kit connects two under dash courtesy light sockets to your headlight switch and door jam switches. Includes sockets with mounting bracket and terminals for bullet, blade or screw type door jam switches. Complete instructions included but not bulbs not included.

Courtesy Light Kit ..... AAW 500081 ..... \$25.95

## Bright Blue Illuminator LED

### StreetWorks

A little LED that's bright enough to use for illumination. Pale blue color provides a nice hue at night. Use for lighting up your glove box, ash tray or to add accent lighting. Very small size snap into a .156" hole or just RTV in place. NOTE: This LED is too bright for use as an indicator light!

Bright Illuminator L.E.D. Light (Ea.) ..... STW L18BRB-5/32 .... \$11.95

## Braided Stainless Door Jam Conduits

Conduits feature one end with a fixed aluminum fitting and an aluminum sleeve bonded to the other end to keep braid from unraveling. An aluminum slide is provided for the conduit to slide through. Fitting and sleeve feature a slip collar with setscrew to butt up against the backside to make installation easy in tight locations. Pair sets.

1/4" I.D. ....	ITS LSS-25 .....	\$37.95
1/2" I.D. ....	ITS LSS-50 .....	\$39.95

## Front Hinged or Suicide Hinged Applications

On a hidden hinge application the door pushes out of the opening as the door opens and hinges away. The unique slide on this conduit system features a nylon ball and socket to allow the conduit to slide through but also take a sharp, quick angle as the door first moves off the door jam.

Hidden Hinge Door Jam Conduits (Pair).....	ITS BB-1934.....	\$69.95
--	------------------	---------

## Hidden Hinge Door Jam Conduits

## Stainless Door Conduits

Conduits are made from stainless spring wire. 1/2" conduits will hold approximately 10 wires, 5/8" conduits will hold approximately 15 wires. Both sizes also available with either hard plastic or aluminum slides. Aluminum slide kit includes an aluminum anchor for the conduit spring to thread into. The plastic slide kit comes with a rubber grommet the conduit pushes/threads into.

1/2" Set Hard-Plastic Slides.....	SPW FWC .....	\$27.95
1/2" Set Aluminum Slides.....	SPW FWC-BA.....	\$53.95
5/8" Set Hard-Plastic Slides.....	SPW XLFWC.....	\$27.95
5/8" Set Aluminum Slides.....	SPW XLFWC-BA ....	\$53.95

## Wireless Door Contacts

These contacts are ideal for use in hidden hinge applications as they can sometimes pose a problem using wireless contacts because the door slides out of the door opening. These contacts feature one side a flat contact area allowing the spring loaded pin to slide in/on without interference problems. Available with a built in ground contact for your dome light to eliminate the extra switch. Sold in pair sets, one set per door/jamb.

### WITHOUT Dome Light Grounding Contact

3 Wire Contact .....	CAR WEK1-3.....	\$44.95
5 Wire Contact .....	CAR WEK1-5.....	\$49.95
7 Wire Contact .....	CAR WEK1-7.....	\$54.95

Button Style W/Flange (3/4" Mounting Hole).....	AAW 500102 .....	\$8.95

## 2, 4 & 7 Function Remote Systems

**StreetWorks** High quality kits come with internal 30amp relays, easy to read and understand instructions and feature an optional built-in safety system to deactivate the remotes when the ignition is on. A "backup" wire is also wired into the harness for you to connect to a momentary switch (not included) so that you can gain access into the car should you loose, or close the car doors with the remotes inside the car. No actuators or solenoids are included with these kits.

2 Function .....	STW L-GM2 .....	\$149.95
4 Function .....	STW L-QD4 .....	\$169.95
7 Function .....	STW L-LK7 .....	\$199.95

## 10 Function Remote System

The CMD-10K can be installed and configured to remotely release the driver's and passenger's door latches,

**Dakota Digital** provide up and down control of both the driver and passenger side window, as well as release the trunk latch or operate a trunk lift up and down. In addition to this, a pair of auxiliary outputs is provided for external relays. These auxiliary relays can be set up as momentarily on or as latch-on, latch-off. A safety feature partially disables the system when the ignition is on to avoid the accidental opening of a door during the vehicle operation. With the ignition on the only functions that are allowed to work are the control of the power windows ..... DAK CMD-10K.... \$199.95

## Basic 3 Function Remote System

### Relays Recommended For High Amp Applications (Not Included)

**ROCKY HINGE CO.** Light duty remote system is recommended for use with screw motor actuators. If you intend to use this kit with solenoids we recommend you install relays between the remote and solenoid. This is a pretty basic kit including a receiver box and two key chain transmitters with instructions for most common installations in opening Bear-Claw latches or door locks.

Basic 3 Function Remote System .....	RHC 2-RTA-01 .....	\$74.95
--------------------------------------	--------------------	---------

### Builder Tip: Remote Control Systems

There is often confusion regarding functions and features in remote systems. Hopefully this will clarify what functions are along with some other explanations to help you make a more informed decision on which system is right for you.

**Functions:** Each single function or channel is one operation to perform. An example would be that one function could send a signal down a wire (when button is pushed) to operate a solenoid (or screw motor) to open one latch/door. Another example would be to send a signal down a wire to move one power window in one direction. The movement of the window up OR down is each a separate action. Up AND down are two actions and would require different signals from the remote system for each up and down movement.

**Polarity Reversing:** Most everyone understands that to make a simple fan run one direction you hook one wire to positive and the other to negative and to reverse the direction we change both wires to the opposite poles. Move what was positive to negative and what was negative to positive to get the fan to run in the other direction. The same is true for power windows, locks and trunk lifts. A power window motor runs one way for the window up and the polarity must be reversed for it to run down. Each of these two actions (up and down) will require a separate channel or function from the remote system. One window up and down requires two functions.

**Polarity Reversing With Relays:** Polarity reversing with relays requires two-relays which connect the two wires from each motor (window or trunk lift) to ground when "relaxed" or off. Each of these two relays is connected to separate functions of the remote system (two relays / two functions). When one function is energized to one of these relays it activates that relay and connects its respective motor wire to positive to make the motor run in a particular direction. When the function is released the relay turns off and the motor stops, activate the other function (relay) and its respective wire is connected to positive and the motor runs the opposite direction. Remember that when the relays are off both motor wires are connected to ground so when either relay is turned on the motor will run in one particular direction.

## 2 & 3 Function Remote Entry Kits With Screw-Motor Actuators 12lb. Pull Actuators Included - For Use With Bear-Claw Style Latches

Systems include receiver, two transmitters, wiring harness, actuators, hardware, weatherproof emergency entry button and built-in safety feature deactivating transmitters when the ignition is on preventing the doors from opening accidentally while driving. Remotes work up to 50' away, give you independent control over driver and passenger doors and have replaceable battery. Instructions included.

2 Function System.....2 Doors ..... ROD 104 ..... \$219.95  
3 Function System.....2 Doors + Trunk..... ROD 103 ..... \$299.95

## 40-lb. Pull Solenoids

Strong Enough For Most Stock Type Latches

Solenoid features sturdy 2-bolt mounting flange and includes 18" of cable, crimp cable anchors, hardware and electrical connectors. Fuse holder with 35 amp fuse and high amperage rated momentary push button switch also included but can be wired to some remote systems. External relays may be required for use with remote systems.

Heavy Duty Solenoid (Each) ..... SRS 8275 ..... \$69.95

## Screw-Motor Actuators & Connection Rods

### 12lb. Pull - Designed For Rotary-Claw Type Latch

12 Volt screw-motor type actuator measures 5-1/8" long (to end of eyelet (compressed)) X 1-7/8" wide X 1" thick. Actuators have 7/8" of stroke.

Actuator Only (Ea.)..... ROD 105 .....\$32.95  
Stainless Connection Rod ..... ROD 117.....\$2.50

## Emergency Entry Systems

### Back-Up Cable System For Use With Electric Entry Systems

Cable backup system connects to door or truck latch to manually release the latch should something happen to your electronic entry system or an electrical failure. Connect one end of the cable to the latch and route the other end to an accessible area so the latch can be released with a pull of the cable. Steel inner cable, nylon kink-resistant outer sleeving, anchors, clamps, hardware and instructions.

Door Entry - Reg. Hinge - Braided Stainless Conduit & Aluminum Pull Knob ..... ITS BKD-1 ..... \$34.95  
Door Entry - Hidden Hinge - Aluminum Cable End & Aluminum Pull Knob..... ITS BB-1943 ..... \$31.95  
Trunk Entry System - Aluminum Cable End & Aluminum Pull Knob ..... ITS BKT-2 ..... \$31.95  
Trunk Entry System - (Econo) Aluminum Pull Knob Only..... ITS SKT-2 ..... \$19.95

## Hidden Hinge Emergency Entry Kit With "Eyeball" Grommet

Unique feature to this kit is the grommet/slide in the jam which allows the braided conduit to not only slide through but the ball will also pivot to take the sharp, quick angle that is characteristic to hidden hinges as the door first moves out of the opening. Basically an improved design of the hidden hinge entry cable kit number BB-1943 above.

Hidden Hinge Emergency Entry Kit..... ITS BB-1943-P ..... \$52.95

### Hot Rod License Plate Light

Small universal license plate light measures only 2-1/2" x 1-1/4" x 1-1/8" tall. Chrome plated housing with frosted white lens with stainless sheet metal mounting screws and foam mounting pad. 12 volt only.

Hot Rod License Plate Light .....SRS 3815 ..... \$9.95

### Art Deco License Plate Light

The So-Cal art deco license plate light is fashioned after automotive designs of the late '30's and '40's die-cast construction and features quality chrome plating. Mounting requires two 3/16" and one 7/8" diameter holes. Includes 12V bulb, pig-tail socket, mounting hardware and neoprene gasket. Light body measures 2-1/2" W x 1-1/2" T x 1-1/4" D

Art Deco License Plate Light .....SOC 62726 ..... \$29.95

### Aluminum Licence Plate Frames

Machined from 6061-T6 billet aluminum and recessed on the back side for the licence plate to set into. Offered as just the perimeter frame only, with tag illumination light or with tag illumination light and 3rd brake light. All frames measure 12-3/8" wide X 6-1/2" tall. Stainless countersunk allen head mounting screws included. Polished to perfection!

Tag Light And 3rd Brake Light .....	BLT 55520 .....	\$69.95

Tag Light Only.....	BLT 55220 .....	\$49.95
Non-Lighted.....	BLT 55120 .....	\$31.95

### Electric Retractable Tag

Fully automatic electric tag retractor includes wire, fuses mounting hardware and instructions. Unit features a built in safety feature should the tag be subject to a hard forward or backward hit a disc spring washer is installed on the motor shaft to allow the tag mount plate to move without damaging the drive motor or internal mechanism. No provision for tag light, use tag frame with illumination light.

Electric Retractable Tag .....GTP TT..... \$319.95

### L.E.D. Split-Window 3rd Brake Light

Can Be Wired For Turn Signals

Light features 2 LED groups powered by individual wires allowing each side to be connected to its respective taillight so it can also be used for turn signals. You can wire both wires together so it works like a conventional 3rd brake light. Adjustable bracket compensates for window angle. Light head measures 8" wide X 3/4" tall

JUO 18200 ..... \$89.95

### Polished Aluminum 3rd Brake Light

Oval style third brake light features swivel base to adjust to rear window angle. Two 12 volt bulbs to help distribute an even light across the lens and is powered by a single wire so it must ground through the light body. Perfectly polished.

3rd Brake Light..... 7" Wide X 1-3/4" Tall X 1" Deep ..... BLT 62220 .....\$49.95

### L.E.D. 3rd Brake Lights

Brake lights feature 20 super bright L.E.D. lights. 12 volt lights have single pedestal type mounting with wires passing through mount to exit out the bottom. Measures 7" wide X 2-1/8" tall (total height) X 1" deep.

Satin Aluminum ..... VIN BA-13613.....\$47.95

Chrome Steel..... VIN SR-13613-LED ...\$49.95

### Rod-Lites

Die cast chrome plated lights feature hollow mounting bolts for wires to pass through. Complete with 12-volt bulbs and amber lenses. Replacement bulbs and lenses are available. Single element lights can be wired for turn signal OR parking lights, dual element light can be wired for both. Sold each.

Small (Single Element) ..... 1-3/8" Tall X 1-5/8" Deep (Lens 1-1/8" X 1-3/4") ..... VIN HR-13302-S ..... \$10.95

Large (Dual Element) ..... 2-3/16" Tall X 2-1/8" Deep (Lens 1-3/4" X 2-3/8") ..... VIN HR-13302-MTS .. \$12.95

### Brite Lights RON FRANCIS WIRING

Machined from billet aluminum and chrome plated these little lights feature glass lenses. Lights are a dual element type for use as park/running and turn signals. Wires pass through the hollow mounting bolt. Light must ground through light body. Amber lenses and sold in pair sets.

"Mini-Bullet" 15/16" Dia. X 1-1/2" Tall X 1-3/4" Long.....RFW SC-61.....\$77.95

### Tube License Plate Light

Light is housed in a polished stainless 7/8" diameter X 8" long tube that has a 2-1/2" slot cut into the bottom for light to come through. Tube mounts with two studs that measure 7" across which ironically is the same spacing as all our tag frames.

Tube License Plate Light .....DMC B-13410-LPL.... \$64.95

## Tri-Bar Headlights With Turn Signals

**SACHSE**  
*Red Shop*

Replacement for standard high & low beam headlights. These come with halogen bulbs, waterproof boot and standard 3 prong style connector. Clear dot in the center and small amber turn signal bulb in the bottom of the reflector with a single element for turn signals only.

5-3/4" Diameter (Pr) ..... SRS 8261 ..... \$32.95

7" Diameter (Pr)..... SRS 8269 ..... \$34.95

## H-4 Headlight Turn Signal Kit

**SPEEDWAY**

If you're running the common H-4 bulbs in your standard or tri-bar headlights, this is just the set-up you need. The turn signal bulb socket simply sets into the 3 prong opening as the H-4 bulb giving you a turn signal inside your headlight. Super bright amber L.E.D. bulbs included. Sold in pair sets.

H-4 Turn Signal Kit ..... SPE 910-64150 ..... \$17.95

## "Deitz" Style Headlights

Universal Applications

**TRIFQUE**  
*INC.*

Very popular style head light features slightly deeper bucket than "king bee" style headlight. Lights come with common 7" diameter sealed-beam type headlight bulbs installed. Replacement 7" sealed-beam bulbs can be purchased at any local auto parts store. Wires run through center of mounting bolt. Sold in pair sets.

### L.E.D. Taillight Bulb

#### 12 Volt - Staggered Pin

A direct replacement for the standard 1157 taillight bulb this L.E.D. retrofit features 15 hyper-bright red L.E.Ds. This bulb is a dual intensity and will illuminate taillight and brake light duties. Measures 1-3/4" deep X 1" round head. Sold each.

LED Taillight Bulb ..... AAW 500567 ..... \$15.95

### Universal Snap-In Light Sockets

Both sockets snap into a 3/4" hole and are metal cased which must be grounded.

Single Contact Socket ..... AAW 500125 ..... \$8.95

Double Contact Socket..... AAW 500126 ..... \$7.95

### Bulb Contact Wire Terminals

These are the small brass wire end terminals that actually contact the lead contacts on the bottom of bulbs when installed in sockets. This is one of those little things that you never really think about until you need one, or ten.

Bulb Contact Wire Terminals (10 pack)..... AAW 500768 ..... \$4.50

### Starburst Lights

*Starburst 2010* is manufactured from 304 stainless steel, mirror polished to increase light reflection within the bezel to enhance the intensity of the ultra bright L.E.D.'s. These high-tech lights are weatherproof and very compact (diameter of a nickel) making them ideal for many applications. Can be used for side marker lights, turn signals, back-up lights, 3rd brake light or anything else you can imagine. Lights themselves are a ultra bright single intensity, to make these function as a dual function running and brake/turn the listed intensity splitter must be used, one per light. Note that this listed RODtronics

intensity splitter is specifically manufactured to work with these *Starburst* lights. Also available in white by special order. Sold Each.

Amber Starburst Light (Each) ..... ROD SB2010-A..... \$44.95

Red Starburst Light (Each)..... ROD SB2010-R..... \$44.95

Intensity Splitter (Each - One Per Light For Dual Function) ..... ROD SPLTR..... \$4.95

## LED Retrofit Kits

*Technostalgia* LED retrofit kits are engineered for each specific vehicle and allow for LED brightness and reliability while using the stock lens, and taillight housings. Drilling or modifications to the original housings are not required to install these retrofit kits. Generally installation time is less than 30 minutes. All hardware and installation materials are included in each kit.

<sup>1</sup> Includes Rapidfire feature. With Rapidfire the brake lights are pulsed rapidly three times within the first 1/2 second of pressing the brake pedal followed by constant on. The cycle is repeated every time the brake pedal is pressed. This feature can be overridden at time of installation.

## "No Load" Flasher

LED lights don't pull a great deal amperage and therefore will not operate a traditional bimetal flasher properly. This "no-load" flasher just installs in your fuel panel like any other would and your LEDs will work properly.

LED No-Load Flasher.....AAW 510226 .....\$19.95

## LED Dummy Loads

When using LED's for turn signals your regular flasher doesn't work right anymore because the LED's don't pull enough amperage to trigger it. This "dummy load" resistor wires in parallel with the LED to add the necessary amperage draw. One dummy load per side is usually sufficient. (Sold in pairs)  
LED Dummy Loads (Pr)..... STW L52DL.....\$8.95

## L.E.D. Intensity Splitter

**This Intensity Splitter Is NOT Required For Any Of The Taillights Kits We Sell.**

An LED is a single brightness when energized, it's not a dual element like a traditional taillight bulb. This splitter makes an LED light act like a double filament light with diminished intensity for taillight and full intensity for brakes & turn signals. One kit required for each LED light.

*StreetWorks*

L.E.D. Intensity Splitter ..... STW L-JE02..... \$4.95

## Rectangular Aluminum Bezel Taillights

Taillights feature 1-1/2" high X 6" wide polished aluminum bezel with hidden mounting studs and 3-3/4" deep plated steel housing. Lights come with dual element LED bulbs for running and turn/brake light circuits. Highly polished. Sold in pair sets.

Open Bezel .....BLT 61225 ..... \$114.95

Split Bezel .....BLT 61125 ..... \$114.95

## Oval Aluminum Taillights

Polished aluminum bezel taillights have prism cut red lens for maximum light effect. Only 3/8" of polished aluminum bezel and lens are on the outside of the car or truck after installed. The all aluminum body and light socket require approximately 4" behind mounting panel. Bezel design holds concealed mounting studs so no hardware is seen from lens side. Sold in pair sets.

4" Wide x 1-3/4" High x 4" Deep .....BLT 61520 ..... \$139.95

## Universal "Frenched" Taillight Assemblies

Features solid red glass lenses and polished aluminum bezels that mount inside 3-3/4" Diameter x 1-1/2" deep steel buckets with hidden mounting hardware. Light housing is powder coated white for maximum light reflection and has removable socket assembly from the side to make it as short as possible and to allow access to the bulb without disassembly. Sold in pair sets.

Universal "Frenched" Taillights .....AFO 50-1 ..... \$119.95

## Pontiac Style Hot Rod Taillights

Taillights feature interior reflector for increased brightness, die-cast chrome plated bezel ring and housing designed to be the shallowest on the market. Mounting pad with molded lip included. Glass lenses and dual element 12 volt bulbs. Blue dot available by special order.

Solid Red Lenses (Each) ..... VIN HR-13405 ..... \$39.95

## '50's Hot Rod Style LED Taillights

Resembling the look of a '50 Pontiac taillight these feature 41 high intensity L.E.D.'s. Lights mount on any flat surface requiring only 3 small holes for mounting studs and wires. Molded rubber mounting pad with lip provided. Measures 4-1/2" diameter.

Hot Rod LED Taillights (Each) ..... VIN 50-13405-LED .... \$46.95

## Ford Taillights

### '32-'37 Driver Side Has Tag Illumination Window - Can Use (2) Right Side Lights For No Tag Window

All lights have 12 volt dual bulbs installed for running light and turn signal circuits and feature solid red real glass lenses. All available special order with blue-dots lenses installed. Most service or replacement parts are available such as tag window lenses, bezels, gaskets and such. Call for more information.

## AFO Taillights

### Requires Larger Opening for Installation

Often the original housing shrouded much of the lens therefor light was only directed into a smaller portion of it. These taillights feature the housing shaped to the lens so the entire lens is filled with light. This larger tapered housing requires a larger hole to install and a cut-out template is provided.

Housings are cast aluminum and white powder coated to reflect light. Bulbs are standard 12 volt dual element and are installed with snap-in retainers into the side of housings as listed. Rear exit bulb location taillights available. Blue dot lens taillights also available by special order.
