Profile Collection

Each Profile Collection wheel is the product of state-of-the-art multi-axis machining technology. Intricate machine code sculpts each spoke to perfect form and balance with thousands of tool paths. Each of these wheel styles spend approximately 4 to 5 times the amount of cycle time compared to typical billet wheels. Billet Specialties provides the absolute best polished finish period. Each style is hand finished over every contour and inside each window. Micro-fine abrasives are used to gently dissolve tool marks to a smooth surface that is brought to a mirror-like finish.

¹ Reference only. Not all styles are available in these back space ranges because of wheel center design differences. Call for specific applications.

² Over 5" back space may cause wheel to interfere with brakes, check before ordering! (15" Dia. only)

Wheel Plates

Will Not Clear Caliper If It Hangs Over The Wheel Mounting Surface
(Usually Front Wheel Drive)

Great for keeping brake dust from getting on your wheels. They also hide the brakes or suspension which is often unsightly in large diameter wheels or wheels with big windows. Wheel plate slides over the studs and wheel holds them in place. Offered in either black powder coated 18 gauge steel or 20 gauge polished stainless. Can be painted to match your color theme. CNC laser cut for perfect balance. Listed in full sets of 4, call for pricing for mix matched sets.

Flush Mount Valve Stems

Flush mount valve stems will give any wheel a clean, smooth look by eliminating that ugly tower valve stem. Manufactured from brass and chrome plated, these flush mount valves are suited to fit all tubeless applications on most chrome, steel, or aluminum wheels. Packaged 4 per set with special inflator adapter included.

Flush Mount Valve Stems MRG 5102 \$23.95
